Quantum provides digital solutions to all your web marketing and design needs. Think of us as a one-stop-shop for web design and development, social media campaigns, and search engine optimisation (SEO). We specialise in small to medium business because we know how to build your business online. How to drive your sales online. We offer a no-nonsense, professional package that sits within your budget and extends your brand presence when your customers search and shop online. Why Quantum for your Website? We build with our end user in mind, and not what works well just for us. We understand that most people are not tech savvy, and we focus on creating a user interface that is easy for our clients to use. Site Speed - We aim to build functionality that is fast to load. This is both on the front end where your site visitors use the site, and in the Admin area where you manage the site. A slow site loses business. We follow strict web standards in our development process, from the project planning, through to final testing. We can build anything - Well, almost! :) In the 10 years we've been in business, we've only once had a development request we couldn't fulfill, and frankly not many could

have. Our skilled development team easily find answers to solutions. We keep it simple. We try and keep our tech talk to a minimum, and talk in language you understand, so our clients understand the solution they are getting. We develop with the search engines in mind. Google especially has strict standard to meet. When you don't meet these, the outcome can be a site Google doesn't like, and this can cost you thousands.
